

DRAGOS PLATFORM SUBSCRIPTION MODEL

An Overview of the Dragos Platform Subscription Model

The Dragos Platform is industrial cybersecurity (ICS/OT/IIoT) technology that arms your organization with the tools to stay ahead of industrial cyber attackers, prevent significant breaches in your environment, and confidently respond to threats to your operations. Keeping pace with the industry shift from traditional perpetual licenses, the Dragos Platform Subscription Model gives our customers the ultimate in flexibility and immediacy for our content-rich offering.

ALWAYS UP-TO-DATE

A key benefit of the Dragos Platform Subscription model is the guarantee your company has the newest adversary intelligence, tools, and protection. Our technology is developed and maintained by analyst-driven intelligence, ICS-specific practitioner experience, and in-field knowledge that is continuously codified into data to give your security team the most up-to-date tools to defend your organization, such as: constantly updated adversary tactics, techniques, and procedures (TTPs) based on our latest intelligence; new indicators of compromise to detect threats in their early stages; and investigation playbooks, authored by Dragos' expert threat hunters and incident responders, to provide step-by-step response guidance.

To provide immediate, seamless delivery of this critical and rapidly-changing content, the Dragos Platform Subscription Model offers single or multi-year software agreements to your industrial organization via a scalable, consistent platform.

WHAT YOU GET

FLEXIBILITY

Pay only for what you use, adding and scaling back licenses as demand requires

SCALABILITY

License only the Dragos Platform modules you need

IMMEDIACY

Continuous access to the most current Dragos Platform upgrades

PRACTITIONER-DRIVEN CONTENT

The latest analytics and content based on dedicated expert threat intelligence

CRITICAL SUPPORT

Rapid, convenient support when you need it most

EASE OF USE

Newest features and software versions available immediately, without the need to manually update

KEY BENEFITS

The Dragos Platform Subscription Model offers flexible, customizable options to meet your organization's unique ICS cybersecurity needs and ensures your security team has immediate access to Dragos' latest intelligence, critical updates, and rapid support when you need it most.

Knowledge Packs Delivered Every 6-8 Weeks

Knowledge packs are codifications of the Dragos team's most up-to-date industrial adversarial information with the tools to investigate and respond to them efficiently, including:

- Threat analytics distilled from adversary behaviors (TTPs)
- Signatures that may indicate malware, exploits, reconnaissance, or propagation
- Indicators of Compromise (IOCs) / Indicators of Attack (IOAs) that identify malicious behavior early in the attack sequence
- Query-Focused Datasets (QFDs) that aid in the investigation process
- Reporting on any new information from the Dragos threat intelligence, hunting, and response teams
- New custom ICS/IT protocol support
- Investigation playbooks authored by Dragos practitioners with best practices and prescriptive investigation guidance
