

DRAGOS PLATFORM SUBSCRIPTION MODEL

An Overview of the Dragos Platform Subscription Model

The Dragos Platform is industrial cybersecurity (ICS/OT) technology that arms your organization with the tools and intelligence to stay ahead of cyber attackers and confidently identify and respond to threats in your environment. Designed to accommodate both CAPEX and OPEX expenditures, the Dragos Platform subscription model gives our customers the ultimate in flexibility and immediacy for our content-rich offering.

ALWAYS UP-TO-DATE

A key benefit of the Dragos Platform subscription model is the assurance your company has the latest asset visibility, vulnerability management, threat detection, and incident response capability available. Our technology is developed and maintained by analyst-driven intelligence, ICS-specific practitioner experience, and insight from customer engagements that is codified into Platform updates delivered through Knowledge Packs.

This provides your security team the most up-to-date tools to defend your organization, including: regularly updated adversary tactics, techniques, and procedures (TTPs) based on our latest intelligence; new indicators of compromise to detect threats in their early stages; and investigation playbooks, authored by Dragos's expert threat hunters and incident responders, to provide step-by-step response guidance.

To provide seamless delivery of this critical and rapidly-changing content, the Dragos Platform Subscription Model offers single or multi-year software agreements to your industrial organization via a scalable, consistent platform.

WHAT YOU GET

-  **Pricing Incentives**
Pay for what you need with discounts and guaranteed SLAs on specific Dragos Platform-enabled Services based on volume tiers
-  **Scalability**
Start with targeted deployments and expand when the time is right
-  **Immediacy**
Continuous access to the most current Dragos Platform upgrades
-  **Practitioner-Driven Content**
The latest analytics and content based on dedicated expert threat intelligence
-  **Critical Support**
Rapid, convenient support when you need it most
-  **Ease Of Use**
Newest features and content updates available on demand through the customer portal to deploy when you're ready

KEY BENEFITS

The Dragos Platform Subscription Model offers flexible, customizable options to meet your organization's unique ICS cybersecurity needs and ensures your security team has immediate access to Dragos's latest intelligence, critical updates, and rapid support when you need it most.

REGULAR KNOWLEDGE PACK UPDATES

Knowledge Packs (KPs) are codified updates of the Dragos team's latest industrial adversary cybersecurity intelligence with the tools to investigate and respond efficiently, including:

- ✓ Threat analytics distilled from adversary behaviors (TTPs)
- ✓ Vulnerability knowledge base updates from both public and private sources enriched with exclusive Dragos analysis, prioritization, and contextual guidance
- ✓ Signatures that may indicate malware, exploits, reconnaissance, or propagation
- ✓ Indicators of Compromise (IOCs) / Indicators of Attack (IOAs) that identify threat behavior early in the attack sequence
- ✓ Query-Focused Datasets (QFDs) that aid in the investigation process
- ✓ Reporting on any new information from the Dragos threat intelligence, hunting, and response teams
- ✓ Regularly updated and expanded IT/OT protocol support coverage for asset characterizations and traffic dissection
- ✓ Investigation playbooks authored by Dragos practitioners with best practices and prescriptive investigation guidance
